The Contracting Officer will incorporate the financing terms of the successful offeror and the FAR clause, Performance-Based Payments, at FAR 52.232-32, in any resulting contract.

(b) In the event of any conflict between the terms proposed by the offeror and the terms in the clause at FAR 52.232-32, Performance-Based Payments, the terms of the clause at FAR 52.232-32 shall govern.

(a) The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either--

(1) Cancel the stop-work order; or

(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if--

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and

(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

(End of clause)

52.242-17 GOVERNMENT DELAY OF WORK (APR 1984)

(a) If the performance of all or any part of the work of this contract is delayed or interrupted (1) by an act of the Contracting Officer in the administration of this contract that is not expressly or impliedly authorized by this contract, or (2) by a failure of the Contracting Officer to act within the time specified in this contract, or within a reasonable time if not specified, an adjustment (excluding profit) shall be made for any increase in the cost of performance of this contract caused by the delay or interruption and the contract shall be modified in writing accordingly. Adjustment shall also be made in the delivery or performance dates and any other contractual term or condition affected by the delay or interruption. However, no adjustment shall be made under this clause for any delay or interruption to the extent that performance would have been delayed or interrupted by any other cause, including the fault or negligence of the Contractor, or for which an adjustment is provided or excluded under any other term or condition of this contract.

(b) A claim under this clause shall not be allowed (1) for any costs incurred more than 20 days before the Contractor shall have notified the Contracting Officer in writing of the act or failure to act involved, and (2) unless the claim, in an amount stated, is asserted in writing as soon as practicable after the termination of the delay or interruption, but not later than the day of final payment under the contract.

(End of clause)

52.243-1 CHANGES--FIXED-PRICE (APR 1984)

(a) The Contracting Officer may at any time, by written order, and without notice to the sureties, if any, make changes within the general scope of this contract in any one or more of the following:

(1) Drawings, designs, or specifications when the supplies to be furnished are to be specially manufactured for the Government in accordance with the drawings, designs, or specifications.

(2) Method of shipment or packing.

(3) Place of delivery.

(b) If any such change causes an increase or decrease in the cost of, or the time required for, performance of any part of the work under this contract, whether or not changed by the order, the Contracting Officer shall make an equitable adjustment in the contract price, the delivery schedule, or both, and shall modify the contract.

(c) The Contractor must assert its right to an adjustment under this clause within 30 days from the date of receipt of the written order. However, if the Contracting Officer decides that the facts justify it, the Contracting Officer may receive and act upon a proposal submitted before final payment of the contract.

(d) If the Contractor's proposal includes the cost of property made obsolete or excess by the change, the Contracting Officer shall have the right to prescribe the manner of the disposition of the property.

(e) Failure to agree to any adjustment shall be a dispute under the Disputes clause. However, nothing in this clause shall excuse the Contractor from proceeding with the contract as changed.

(End of clause)

52.243-5 CHANGES AND CHANGED CONDITIONS (APR 1984)

(a) The Contracting Officer may, in writing, order changes in the drawings and specifications within the general scope of the contract.

(b) The Contractor shall promptly notify the Contracting Officer, in writing, of subsurface or latent physical conditions differing materially from those indicated in this contract or unknown unusual physical conditions at the site before proceeding with the work.

(c) If changes under paragraph (a) or conditions under paragraph (b) increase or decrease the cost of, or time required for performing the work, the Contracting Officer shall make an equitable adjustment (see paragraph (d)) upon submittal of a "proposal for adjustment" (hereafter referred to as proposal) by the Contractor before final payment under the contract.

(d) The Contracting Officer shall not make an equitable adjustment under paragraph (b) unless--

(1) The Contractor has submitted and the Contracting Officer has received the required written notice; or

(2) The Contracting Officer waives the requirement for the written notice.

(e) Failure to agree to any adjustment shall be a dispute under the Disputes clause.

(End of clause)

The Contractor is responsible for performing or having performed all inspections and tests necessary to substantiate that the supplies or services furnished under this contract conform to contract requirements, including any applicable technical requirements for specified manufacturers' parts. This clause takes precedence over any Government inspection and testing required in the contract's specifications, except for specialized inspections or tests specified to be performed solely by the Government.

(End of clause)

52.246-16 RESPONSIBILITY FOR SUPPLIES (APR 1984)

(a) Title to supplies furnished under this contract shall pass to the Government upon formal acceptance, regardless of when or where the Government takes physical possession, unless the contract specifically provides for earlier passage of title.

(b) Unless the contract specifically provides otherwise, risk of loss of or damage to supplies shall remain with the Contractor until, and shall pass to the Government upon--

(1) Delivery of the supplies to a carrier, if transportation is f.o.b. origin; or

(2) Acceptance by the Government or delivery of the supplies to the Government at the destination specified in the contract, whichever is later, if transportation is f.o.b. destination.

(c) Paragraph (b) of this section shall not apply to supplies that so fail to conform to contract requirements as to give a right of rejection. The risk of loss of or damage to such nonconforming supplies remains with the Contractor until cure or acceptance. After cure or acceptance, paragraph (b) of this section shall apply.

(d) Under paragraph (b) of this section, the Contractor shall not be liable for loss of or damage to supplies caused by the negligence of officers, agents, or employees of the Government acting within the scope of their employment.

(ii) If the Contractor fails to comply with the requirements of paragraph (g)(1)(i) of this clause, or fails to perform the agreement at paragraph (g)(1)(i)(C) of this clause, and, in the absence of a properly executed novation or change-of-name agreement, the CCR information that shows the Contractor to be other than the Contractor indicated in the contract will be considered to be incorrect information within the meaning of the "Suspension of Payment" paragraph of the electronic funds transfer (EFT) clause of this contract.

(2) The Contractor shall not change the name or address for EFT payments or manual payments, as appropriate, in the CCR record to reflect an assignee for the purpose of assignment of claims (see FAR Subpart 32.8, Assignment of Claims). Assignees shall be separately registered in the CCR database. Information provided to the Contractor's CCR record that indicates payments, including those made by EFT, to an ultimate recipient other than that Contractor will be considered to be incorrect information within the meaning of the "Suspension of payment" paragraph of the EFT clause of this contract.

STATEMENT OF WORK: SUB-SLAB DEPRESSURIZATION PILOT PROGRAM
COLONIE FUSRAP SITE
COLONIE, NEW YORK

27 Yardboro Avenue
68 Yardboro Avenue

BACKGROUND

The Colonie Site is located at 1130 Central Avenue in the Town of Colonie, Albany County, New York. The site is an 11-acre parcel with a long history of industrial activities dating back to 1923. During the Colonie Site's operational history, acids, bases, chlorinated solvents, radioactive material, and other specialty chemicals were stored, used, and disposed on the premises. The U.S. Army Corps of Engineers (USACE) is currently managing the characterization and cleanup of the Colonie Site under the Formerly Used Site Remedial Action Program (FUSRAP).

Groundwater sampling conducted at the Colonie Site has indicated the presence of low levels of volatile organic compounds (VOCs), including the chlorinated solvents and their breakdown products tetrachloroethene (PCE), trichloroethene (TCE), 1,2-dichloroethene (1,2-DCE), and vinyl chloride. In an effort to evaluate contaminant migration pathways and because vapors from subsurface groundwater contamination may potentially affect the indoor air quality in houses by migrating into the basements via cracks or conduits in the floor slabs, indoor air sampling was conducted in selected buildings located directly downgradient of the site along Yardboro Avenue (Shaw, 2003). Three rounds of indoor air sampling have been conducted to date: Summer 2001, Winter 2003, and Winter 2004.

Based on a preliminary evaluation of the available air sampling data, the properties at 27 and 68 Yardboro Avenue were selected as locations for the installation of sub-slab depressurization systems. These systems will form the basis of a pilot study that will be used to evaluate the effectiveness of commercial off-the-shelf (COTS) radon systems for use in the removal of vapors related to VOC contamination. According to available information, COTS radon systems can effectively remove VOC contamination to the extent necessary to meet removal goals, with 75% of such systems requiring no modifications (Folkes, 2002).

STATEMENT OF SERVICES

The Contractor will furnish all necessary personnel, materials, and services needed, or incidental to, performing the work outlined in this SOW. USACE will provide oversight of the Contractor's activities throughout the conduct of their activities under this contract.

TASK DESCRIPTION

1. Initial Site Visit and Submission Requirements

An orientation meeting and initial site visit will be scheduled for all bidders prior to proposal submission. The purpose of this meeting will be to familiarize the bidders with the site conditions and answer questions related to the overall approach of the pilot study.

Bidders shall submit their proposal using the attached bid sheet within 14 calendar days of the orientation meeting and initial site visit. The proposal shall include a breakdown of costs and a list of all pertinent assumptions. The Contractor shall also provide the names, addresses, and phone numbers of a minimum of three references; USACE will contact these firms/individuals prior to contract award. Preference will be given to bidders who have demonstrated experience with other Federal or State agencies, but bidders without such experience will not be excluded from consideration.

2. System Requirements and Assumptions

Under this Statement of Work (SOW), the Contractor will install two COTS radon systems, including all necessary wiring, piping, hardware, and accessories needed for operation. One system will be installed at each of the following residences: 27 Yardboro Avenue and 68 Yardboro Avenue.

Systems shall be installed in a manner consistent with U.S. Environmental Protection Agency (EPA) guidelines found in the document, *Radon Reduction Techniques for Existing Detached Houses: Technical Guidance (Third Edition) for Active Soil Depressurization Systems* (EPA, 1993). Prior to installation of the system, visible cracks, joints in the floor, and utility penetrations shall be sealed using acrylic latex caulk to the degree practicable.

For cost estimating purposes, bidders shall assume that the systems to be installed under this SOW will include one suction point, a standard size suction pit (1-3 cubic feet in volume), and a 150-watt fan with a nominal flow rate of approximately 200 cubic feet per minute. Fans will be installed outside of the homes, in the attic, or in the garage, based upon input from the residents. The discharge point will be located at least ten feet above the ground and should be at least ten feet from any doors or windows and will be coordinated with the existing homeowners. If this is infeasible due to the layout of the house, the discharge point should be situated at least two feet above any doors or windows. Prior to activation of the system, a test will be conducted to insure that adequate suction has been established. The system shall be equipped with a sampling port located outside the house between the blower and the discharge point to facilitate testing of system performance.

The Contractor shall design the systems to maintain functionality in the presence of seasonally shallow groundwater in the vicinity of the Yardboro Avenue properties. The Contractor's proposal should include a description of any changes to the baseline system described in this SOW that is required to address the issue of shallow groundwater.

Deviations from this baseline design may be made during the proposal submittal, if needed, based on the initial site visit. However, any other deviations from the design after contract award are subject to USACE approval prior to implementation. System modifications once the pilot study has begun will be based on testing conducted by USACE to assess removal efficiency and are not covered under this SOW.

3. Deliverables and Schedule

Within 14 calendar days of contract award, the selected bidder shall submit a brief letter proposal that presents a description of how the work will be accomplished, a simple flow diagram for the system that is to be installed, and a schedule. USACE will deliver any comments on the proposal within 14 calendar days. Installation of the system will be expected to commence within seven to fourteen days of USACE acceptance of the Contractor's proposal.
